Skills

- Nest.js | React | Next.js | Kotlin | Java | JavaScript | TypeScript | Dart | PHP | Python | Android | React Native | CodeIgniter | Laravel
- AWS | GCP | Firebase | CI/CD | Jest | Docker | Fargate | Terraform | Serverless | MongoDB | MySQL | Postgres | Redis | Git | Linux
- System Design | Distributed Systems | Full-Stack | API Design | Kysely | Tailwind | Material UI | Bootstrap | **English**, **Arabic**

Experience

Chief Technology Officer — Studio 20 — 09/2021 - Current

- Leading the technology strategy and overseeing the technology management.
- Ensuring alignment of the technology roadmap with business goals.
- Managing the technology team and fostering a culture of innovation and efficiency.

Lead Software Engineer — 09/2023 - 07/2024

- Conducted code reviews to maintain high code quality.
- Designed and maintained software infrastructure.
- Provided technical leadership and mentorship to the backend team.

Senior Software Engineer — 09/2021 - 08/2023

- Developed high-quality mobile and web applications that met client specifications and needs, incorporating backend services for enhanced functionality.
- Worked closely with clients and stakeholders to understand their requirements, provide technical guidance, and ensure that project goals were met on time and within budget.
- Contributed to the development of the company's technical roadmap, identifying new technologies and approaches that could improve the efficiency and effectiveness of the development process
- Implemented best practices and industry standards for software development, ensuring that projects were scalable, secure, and maintainable.

Software Engineer — Nejoum Al Jazeera — Dubai, UAE — 10/2020 - 09/2021

- Contributed to the development of a car shipping system that seamlessly integrated with international auction systems, including Copart and IAAI.
- Maintained and integrated in-house software, including accounting, tracking, and reporting applications to improve operational efficiency.
- Worked on the front-end and back-end of the application, utilizing technologies such as React, Php laravel, and Mysql.
- Contributed to the development of a mobile application that enabled customers to track their cars and access accounting reports.
- Ensured application scalability, security, and user satisfaction through AWS cloud infrastructure and services.

Software developer (Parttime) — The Techy Hub — KL, Malaysia — 09/2018 - 03/2019

- Designed and built a mobile application for grocery shopping, featuring live map integration.
- Worked with Laravel to develop the backend services for the application.
- Ensured high-quality code and adherence to best practices in software development.
- Collaborated with team members to identify and implement new features and improvements.

Technician — Kasper Technology — Aden, Yemen — 02/2014 - 07/2016

- Diagnosed and resolved software/hardware issues for smart mobile devices and computers.
- Maintained and configured equipment such as routers and peripheral devices.
- Provided technical support to customers, resulting in high levels of client satisfaction and retention.

Education

Bachelor of Computer Science — APU / Staffordshire Dual Degree — Malaysia /UK — 09/2016 - 09/2019

- Dual Degree Program BSc (Hons) in Computer Science with a 3.5 GPA

Projects

- **Instagrocery:** Personalized grocery shopping app with ML integration for finding nutritious products based on the user's dietary goals
- **Heyprop:** Tech-enabled web platform offering real estate properties & home services for households, serving users, agents, & merchants
- **NFC:** Offline-first app with cloud syncing functionality that uses NFC technology to track animals & their processes in farming environment

Others

- **Code Arena**: Organized and led a coding competition for software students in Kuala Lumpur in 2017. Provided students an opportunity to showcase their skills and compete against peers.
